**Are you our new  
Production Engineer – Quality ?**

# Are you our new Production Engineer, Quality?

You will be part of the PE department, which is the part of the production department, and your workplace will be at the head office for ultrasound in Herlev. You will refer to the Head of Production Engineering in Denmark.

## The job:

- Lead collection and analysis of quality and process data from the shop floor to highlight improvement opportunities (lead time, cycle time, standard combination charts, yield etc.)
- Drive continuous improvement initiatives in collaboration with Lean department (assist and/or lead A3 projects, kaizen events etc.)
- In collaboration with our quality department and our internal repair team, lead resolution of non-conformities and mitigation plan
- Coordinate – together with Quality - improvement actions related to incoming inspection procedures and in-process quality
- Coordinate – together with EHS – improvement actions related to ergonomics and safety

## Your professional background could be:

- Master degree on technical areas (Engineering) with exposure to EHS and Lean or graduate student approaching graduation
- Experience in a similar position in an international company, preferably within medical devices is a plus
- Exposure to lean manufacturing concepts and participation in kaizen events is a plus

## About you:

- You are a fresh graduate out of Engineering University or close to your graduation and you are ready to jump on a hands-on job with opportunity to show your analytical and leadership skillset
- You are a team player with ambitions to lead small groups on specific projects
- You have an analytical mindset and are familiar with common tools for improvement projects (pareto, A3 template, fishbone etc.)
- Comfortable with working with several parallel tasks
- Danish language skills are required.
- Must be able to communicate fluently in English
- Must be able to work independently

If you have questions about the position, you are welcome to contact Manager, Production Engineering, Nicolaj Sommer - [nsommer@bkmedical.com](mailto:nsommer@bkmedical.com).

We are looking forward to hear from you.

# BK Medical

BK Medical is a company in rapid and global growth. We make meaningful products that help diagnose and improve outcomes of surgeries - thus save lives.

The head office is located in Herlev in beautiful modern buildings and houses over 280 people. We have development and production under one roof - together with our sales and staff functions - which creates a fantastic dynamic environment.

BK Medical is a company in rapid and global growth. We make meaningful products that help diagnose and improve outcomes of surgeries - thus saving lives.

We wish to motivate our employees to take responsibility and influence their own work situation.

We value a healthy work environment with compassion for each other in order to obtain good relations and a high job satisfaction.

# BK Products Guides Procedures for the Surgeon

*“By working within these specialties, I realized that I could provide or improve the health care system that way.”*

- Rikke von Barm, Specification Engineer

*“I chose to pursue a career in the medtech industry because I want to work at a place where both the company and the colleges always strives for achieving better.”*

- Rasmus H. Rossen,  
Senior Mechanical Engineer

# BK Medical

## ● Global Organization

BK Medical is an international company with sales offices all over the world, and European headquarters in Herlev, Copenhagen.

At BK Medical, we support employees in developing their skills and expertise. We have a professional and informal organization with flexible working conditions and a flat organizational structure. We are effective and can execute our ideas into strong products – these ingredients make BK Medical an exciting and development-oriented workplace.

We look forward to welcoming you to a team that makes a difference – a difference to quality of life.

## ● Intraoperative Ultrasound

BK Medical is committed to designing ultrasound systems that help surgeons image, guide, intervene, and navigate inside the human body. Surgeons are our customers, and they range from HPB surgeons, neurosurgeons, and robotic-assisted surgeons to urologists, colorectal surgeons, and more.

Our mission at BK is to enable real-time intraoperative guidance during surgical procedures, giving surgeons the information needed to immediately make critical decisions. Our products are designed and customized for surgical procedures to help surgeons save time and get results.

Now, BK Medical is advancing its mission with GE Healthcare. Together, we will reach more customers and continue to empower surgeons to make critical decisions that allow for better care, faster procedures, and reduced complications.

As market leaders, we work closely with experts and universities to provide the best solutions to clinical challenges.

## ● Research and Development

BK Medical has development departments in Denmark and the US. The largest development team is based in Denmark. We develop software, hardware, mechanics, signal processing, and advanced algorithms.

When it comes to research, we have collaborated with the Technical University of Denmark (DTU) for more than 20 years. Together, we have completed 2 high technology projects for advanced ultrasound imaging.

We are currently part of a large-scale project with DTU, Danish hospital Rigshospitalet, and the University of Copenhagen concerning extreme high-resolution ultrasound.
