Finance Controller

*BK Medical is currently looking for a
Finance Controller with responsibility for our R&D spend*

Finance Controller

BK Medical is looking for a Finance Controller to provide timely, transparent and reliable financial reporting of BK Group R&D spending to the BK management team and Corporate Finance at GE HealthCare. You will become a part of our Finance team which consists of 8 dedicated employees in Herlev. As our new Finance Controller, it is important that you work systematically, meticulously and with a good overview as well as attention to detail. You must be a good team player, have good communication skills and have a good sense of humor.

Key responsibilities for our new Finance Controller

- Project controlling of our global R&D projects
- Controlling of back office, with a focus on our R&D department
- Budget and forecasting of R&D projects, including department cost
- Reporting of project status to Corporate
- Managing month-end close for agreed areas
- Supporting the rest of the finance team
- SOX testing

Typical tasks to do

- Serve as R&D finance partner regarding reviewing the development in costs according to defined targets, including detailed project follow-up
- Monthly follow-up meetings with department leaders to understand and report actual/forecast
- Finance partner for business case calculations
- Participate in ad hoc activities as directed by Director of Finance

Your professional background could be

- Bachelor in accounting or similar
- Min. 3-5 years of experience in a similar role
- Strong technical and analytical financial background, preferably from a global company
- Good business understanding
- Experienced user of IT systems such as Microsoft Office and SAP
- Knowledge about Hyperion is an advantage
- Knowledge about US GAAP and SOX an advantage

To be successful in the job as our new Finance Controller it is important that you work systematically, meticulously and with a good overview as well as attention to detail. You must take responsibility for your own task and work processes, be a good team player, have good communication and co-ordination skills and have a good sense of humor.

We look forward to receiving your application, in which you describe 1) what your motivation is for becoming part of our finance team and 2) which of your experiences and skills you will particularly contribute.

If you have questions about the position, you are very welcome to contact Director of European Finance, Daniel Banemann – Daniel.banemann@ge.com. We look forward to hearing from you.

BK Medical

BK Medical is a market leader in active imaging and has always been committed to designing systems that help surgeons visualize anatomy and lesions, guide interventions, and navigate inside the human body. BK Medical is an international company with sales offices all over the world, a global headquarter in Boston, a European headquarter located in Herlev, Denmark, and a transducer manufacturing site in State College, Pennsylvania, US.

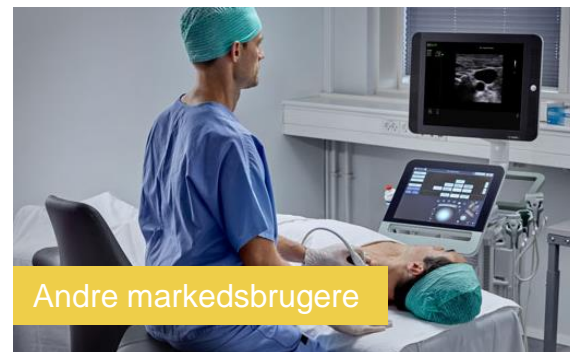

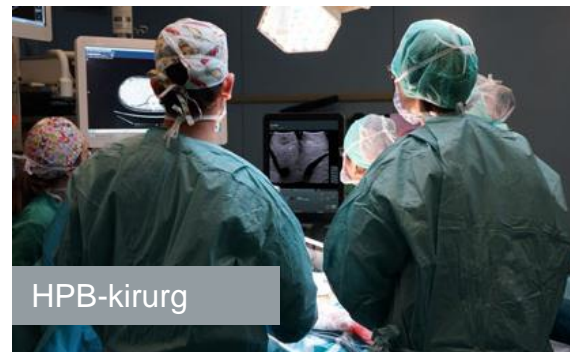

Our company employs approximately 800 employees globally and close to 300 in Herlev. In 2021, BK Medical was acquired by GE Healthcare. With this acquisition, GE Healthcare adds the fast-growing and relatively new field of real-time surgical visualization to GE's pre- and post-operative Ultrasound capabilities, creating an end-to-end offering through the full continuum of care from diagnosis through therapy and beyond.

Through significant synergies with the benefit of GE's technology and commercial scale, BK Medical will be able to reach new customers and markets around the world.

BK Medical's Headquarter is placed in Herlev Copenhagen, in lovely and modern buildings with around 300 people. The work atmosphere is casual, and our organizational structure is flat.

We have a good staff canteen focusing on health and variety, we have private health insurance and pension plans as well as social joint events and several staff clubs.

BK designer ultralydssystemer, der hjælper kirurger med at scanne, styre, foretage indgreb og navigere inde i menneskekroppen

“By working within these specialties, I realized that I could provide or improve the health care system that way.”

- Rikke von Barm, Specification Engineer

“I chose to pursue a career in the medtech industry because I want to work at a place where both the company and the colleges always strives for achieving better.”

- Rasmus H. Rossen,
Senior Mechanical Engineer

BK Medical

● Global organisation

BK Medical er en international virksomhed med salgskontorer over hele verden. Vores europæiske hovedkontor ligger i Herlev tæt på København.

Hos BK Medical støtter vi, at vores medarbejdere udvikler deres kompetencer og viden. Vi er en professional og uformel organisation med fleksible arbejdsvilkår og en flad struktur.

Vi er effektive og fører vores ideer ud i livet i form af stærke produkter – hvilket gør BK Medical til en spændende og udviklingsorienteret arbejdsplads.

Vi glæder os til at byde dig velkommen i et team der gør en forskel – en forskel for livet.

● Intraoperativ ultralyd

BK Medical er engageret i at designe ultralydssystemer, der hjælper kirurger med at scanne, styre, foretage indgreb og navigere inde i menneskekroppen. Vores kunder er kirurger og spænder fra HPB-kirurger, neurokirurger og robotassisterede kirurger til urologer, kolorektale kirurger med flere.

Vores mission er at muliggøre intraoperativ vejledning i realtid under kirurgiske indgreb ved at give kirurger de nødvendige oplysninger til straks at træffe kritiske beslutninger. Vores produkter er designet og tilpasset til kirurgiske indgreb for at hjælpe kirurger med at spare tid og opnå resultater.

Nu fremmer BK Medical sin mission med GE Healthcare. Sammen vil vi nå ud til flere kunder og fortsætte med at give kirurger mulighed for at træffe kritiske beslutninger, der giver mulighed for bedre pleje, hurtigere procedurer og reducerede komplikationer.

BK Medical er markedsledende og arbejder tæt sammen med eksperter og universiteter for at levere de bedste løsninger til kliniske udfordringer.

● Forskning og udvikling

BK Medical har udviklingsafdelinger i Danmark og USA. Det største udviklingsteam har til huse i Danmark. Vi udvikler software, hardware, mekanik, signalbehandling og avancerede algoritmer.

Når det gælder forskning, har vi samarbejdet med Danmarks Tekniske Universitet (DTU) i mere end 20 år. Sammen har vi gennemført 2 højteknologiske projekter til avanceret ultralydsscanning.

Vi deltager for øjeblikket i et stortilet projekt med DTU, Rigshospitalet og Københavns Universitet om ultralyd med ekstrem høj opløsning.
